

## CIVIL ENGINEERING SURVEYOR

The Journal of the Chartered Institution of Civil Engineering Surveyors

### Article Guidelines for Civil Engineering Surveyor (CES)

CES, the monthly journal of the Chartered Institution of Civil Engineering Surveyors (ICES), welcomes proposals and submissions for articles covering any topic within the civil engineering surveying field. As our readership covers a diverse range of specialisms, we encourage articles that are informative and easy to understand for the non-specialist.

We publish articles varying in length from 800 to 3,000 words, preferably with relevant photographs, images and diagrams. If you are submitting an article electronically, please do not embed images in a word document, but attach them separately as high resolution (300dpi) tif or jpeg files.

We ask that before you prepare and submit an article for our consideration, please send a short outline or summary to the editor to ensure that it would be of relevance to our readers.

There is no guarantee that any submitted article will be printed and we reserve the right to edit any article we decide to publish. All articles must be attributed to appropriate author(s) and all approval procedures with regards to image copyright, project contracts etc must be carried out prior to submission. As CES is the journal of a professional institution, articles that are written purely to promote a particular product or company will not be considered suitable matter for publishing as editorial.

If you would like to submit a proposal, please send us your full contact details including your company name and your position there, together with a brief synopsis, to the editor, Darrell Smart at:  
*Civil Engineering Surveyor*, ICES, Dominion House, Sibson Road, Sale, Cheshire M33 7PP United Kingdom
